

Sergei Kartin

Senior Frontend Engineer

Novosibirsk, Russia (Open to remote) | sergei.kartin@gmail.com | [Telegram](#) | [LinkedIn](#)

Senior Frontend Engineer with 8+ years specializing in React and TypeScript. Proven track record building scalable web applications and design systems for international teams. Expert in performance optimization, architecture, and Developer Experience improvements.

Skills

Frontend

- React, TypeScript, Next.js, Vite
- State management: TanStack Query, Apollo
- Architecture: Feature-sliced design (FSD), monorepo (Yarn workspaces, Nx)
- UI Design Systems, Web Vitals optimization
- Testing: Jest, Vitest, React Testing Library
- SSR: Next.js, Astro

Backend

- Node.js, Java
- REST / GraphQL API design

Experience

Bettermode, Remote | Front End Engineer

2020 - 2024

- Designed and maintained a UI kit of 30+ components built with React and Tailwind, accelerating frontend development for a team of 5–10 developers
- Implemented a design system with theme support and dark mode, improving UI consistency and customization capabilities
- Improved Developer Experience (DX) by migrating from Webpack + React 16 to Vite + React 18: HMR improved from >30s to instant hot module replacement, initial bundle size reduced by 50%

Toptal, Remote | JavaScript Developer

2019 – 2020, 2024 – 2025

- DeliveryHero (2024–2025): Enabled seamless migration to new app version for restaurant portal through reverse engineering and wrapper refactoring

- Picket Studio (2019–2020): Built a chatbot for Facebook Messenger for University of Sydney prospective students using Botkit, improving engagement through automated responses to common questions

ListingLoop, Remote | Front End Engineer

2018 - 2019

- Developed an MVP for the Australian real estate market using Firebase, React, and Redux
- Product achieved \$500K crowdfunding goal within three months

Azoft, Novosibirsk | Senior Java Developer

2017 – 2018

- Led development of a financial social network MVP in a team of five engineers
- Refactored the customer loyalty web application for a top-5 Russian bank, improving scalability and enabling deployment to two additional banks

Previous experience: Java Developer

2008 – 2016

- Easysport (Remote, 2012–2016): Developed a web application for sports facility booking (Java, EJB, JSF)
- Softage (Novosibirsk, 2008–2012): Developed features to increase customer engagement
